SUBJECT:

Review of the Senior Intelligence Service System

1. I am conducting a review of the Senior Intelligence Service (SIS) system to determine whether it is the most effective and beneficial system for Agency and ICS employees, whether we should change parts of the existing system, or attempt to establish a different system. In this regard, I am soliciting the views of the Career Services on the effectiveness of the current SIS system and any changes they may wish to recommend.

2. The comments of your Career Service are requested by 13 April 1984 so that I may consolidate the results of this review at an early date.
